Sumit Singh

Frontend Developer

+91 9654976708 | sumitsingh.work555@gmail.com | LinkedIn | GitHub

Summary — A frontend React.js Developer with over 2 years of experience in building responsive, user-friendly web applications. Skilled in developing dynamic interfaces, integrating REST APIs, and optimizing performance for better user experience. Strong focus on writing clean, maintainable code and delivering efficient solutions that align with business needs.

Skills

Languages: JavaScript, HTML, CSS, Sass, React JS, Next.js, Redux, Bootstrap, MUI, REST APIs

Tools & Environment: Git, GitLab, GitHub, Visual Studio Code, Postman and Sentry.

Additional Skills: API Integration

Experience

Appcode Technologies Pvt Ltd **January 2024 – Present**

Software Developer

- Designed and developed highly responsive and engaging user interfaces.
- Structured web pages to meet user requirements with a focus on both functionality and aesthetic appeal.
- Enhanced user experience with smartphone-optimized features.
- Built reusable code for efficient development and optimized web performance.
- Collaborated with development teams to brainstorm and implement UI solutions.
- Reviewed application requirements and interface designs for seamless integration.

Projects

Bidding Karo - Bidding Management System for Large-Scale Procurement **January 2024 – March 2025**

Collaborated on the development of a comprehensive Bidding Management System, focusing on frontend implementation to enhance user experience and streamline procurement processes.

- Designed and developed responsive user interfaces for bid creation and supplier participation using React.js.
- Enhanced usability by creating dynamic components to display detailed bid specifications for buyers.
- Implemented real-time UI updates to reflect bidding status, improving transparency during live bidding sessions.
- Contributed to the development of a seamless user experience through efficient integration with backend APIs.

Tech Stack: React.js, Redux, HTML, CSS, JavaScript.

Unlisted Buzz – Unlisted Shares & Pre-IPO Platform **September 2025 – February 2026**

Collaborated on developing a modern web platform for discovering and trading unlisted shares, focusing on performance, scalability, and a smooth user experience.

- Built responsive and SEO-friendly pages for share listings, company insights, and live market data using **Next.js**.
- Developed interactive components for search, filter, and comparison of unlisted shares.
- Integrated **REST APIs** to fetch and display real-time company data and share prices.
- Implemented server-side rendering (SSR) and dynamic routing for optimized performance.
- Improved page load time and navigation through code splitting and caching strategies.

Tech Stack: Next.js, React.js, HTML, CSS, JavaScript.

Education

Bachelor of Computer Applications (IGNOU)
2021 – 2024
